

INFRASTAKE™
PATENT NO. 6,099,291

Extol, Inc. welcomes you to an innovative automation solution, featuring a quicker, more efficient, and controllable method for plastic part joining – InfraStake™.

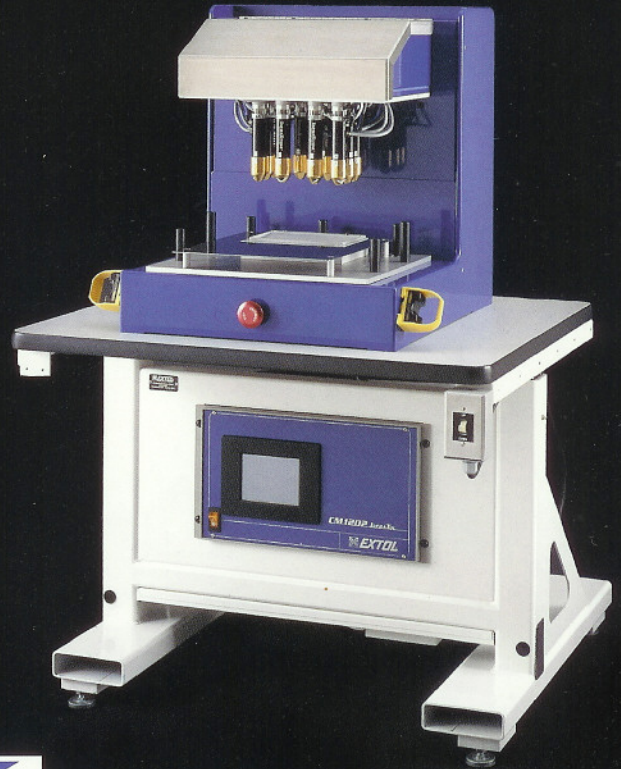

The InfraStake process utilizes infrared energy for uniform heating and staking. InfraStake is available in various sizes and can produce a stronger, tighter joint in less time than conventional methods. This translates into lower manufacturing costs. Extol can supply the necessary components for integration into your equipment or provide a complete turnkey system.
