

PAT Slim Line Welder Table

PAT's Slim Line Welder Table is designed to support your ultrasonic welding equipment. This lean style table provides a portable workstation for ease in moving the machine to and from your work cell. This table is designed for direct use with most ultrasonic welders. *Why pay more for a special table or use a table not designed specifically for your machine? For the price of a welder base you can have a mobile table that fits your production requirements. Order your ultrasonic equipment without a base and purchase a PAT slim line table to save money on your ultrasonic welding equipment.*

PAT Welder Table with Base

PAT Slim Line Table with Hub Mount

Features of the PAT Slim Line Table:

- Built from aluminum extrusion and aluminum plate to easily adapt to all of PAT's accessory products and allow additional customization.
- Table top secured directly to the table frame. Drilled and tapped to accept welder base, hub mounts or fixtures.
- Only 20 1/2" wide, 31 1/2" deep and 37 1/4" all to table top.
- Table supports the optional PAT Sound Enclosure for noise reduction or the optional Safety Start Light Curtain System.
- Slim Table design Improves productivity.
- Includes locking swivel casters.
- Includes power supply shelf. Includes 2nd shelf for computer, fixtures, horns or other miscellaneous items.
- Includes slot at rear of table for routing welder cables.
- Optional PAT part bins will position part components to be welded close to the work.
- Optional PAT palm buttons to initiate ultrasonic welder cycle.
- Optional PAT hub mount for welder columns.
